## COUPE-ELEVATION

**Sommier existant**

The diagram illustrates a floor joist system. It features a central UAP 80 joist supported by IPE 100 joists. On either side, there are two sets of IPE 120 joists. The distance between the outer vertical supports is 7.250. The height of the joists is 1.000. The span between supports is 3.367 on the left and 3.418 on the right. The joists are labeled with their type and dimensions: IPE 120, UAP 80, and IPE 100.
